

IPHONE EMAIL SETUP

1. From the home screen on your device tap **Settings**, and then **Mail, Contacts, Calendars**.
2. You'll will now need to tap **Add Account**, Tap **Other** and then **Add Mail Account**.

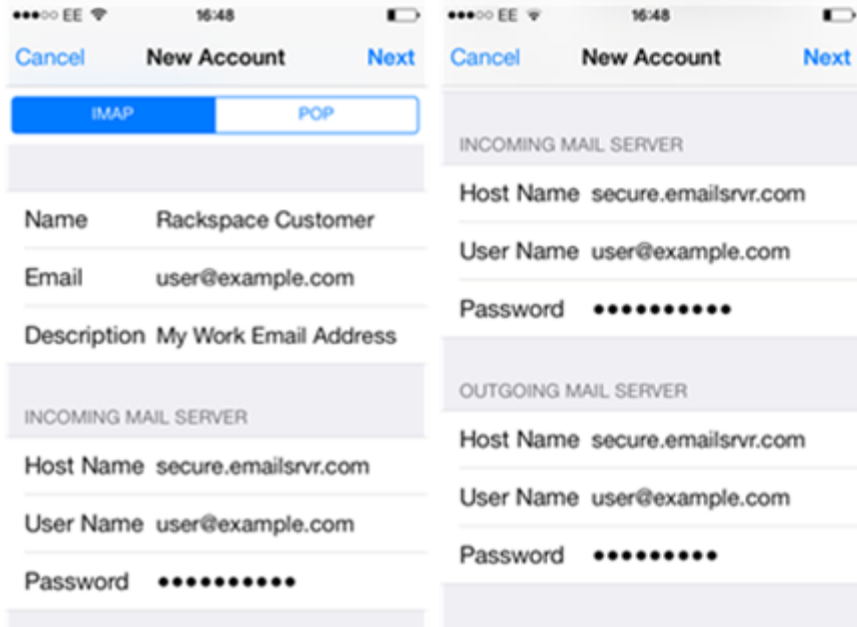

3. The "New Account" screen will appear and you'll then Enter in the following information in the fields provided, and then tap the **Save** button.

- Name - Enter in your first and last name. This is the name that will appear in the **From** field of messages you send.
- Address - Enter your entire email address (e.g., user@example.com).
- Password - Enter the password for your email account.
- Description - Enter a descriptive name for the account (e.g. My Work Email Address). This description will only be visible to you.

4. After your account has been looked up, you'll then select **IMAP** located at the top and then enter in both the **Incoming Mail Server** and **Outgoing Mail Server** fields with the following information:

- Host Name - Enter in the secure server name: **secure.emailsrvr.com**
- User Name - Enter in your entire email address (e.g., user@example.com).
- Password - Enter in the password for your email account.

5. After you've entered in all the information, tap **Save** and the device will then verify your settings. After you've been verified, you'll then be taken to the **Mail & Notes** screen, finally Tap the **Save** button.
